

Job certificate

To whom this may concern.

I certify that Samu Syrjänen worked within my group as a research assistant / data engineer for a period of 12 months (from December 2024 to November 2025). His work was related to European Space Agency Hera mission and focused on implementation of an ASPECT hyperspectral camera image processing pipeline, conversion to Planetary Data System version 4 (PDS4) standard, and interfaces to project repositories. The project is truly a consortium project with international stakeholders and partners. Samu oriented himself fast in the new environment and had sufficient coding skills to proceed in the data processing. He was also actively engaged with other partners outside of our organization. His contribution was invaluable and will contribute to the whole Hera mission success. Thus, I fully recommend him to work on complex data projects.

A handwritten signature in black ink, which appears to read 'Tomáš Kohout'.

Doc. Tomáš Kohout

ASPECT hyperspectral camera PI

Research fellow Aalto University
